

TOR-MASTER

NEW

FERTILIZER CADDY

FEATURES

Low profile for better stability
in all terrains

8'5" height, 13'3" width, 24'3"
length

The TOR-MASTER Liquid Fertilizer Caddy is designed for minimal compaction with track under carriage.

HYDRAULIC ACCUMULATOR

Keeps even pressure on track system
Accumulator will compensate changing temperatures that cause tracks to vary in tension

Mud build-up on wheels will not affect tension on tracks

Longer life on tracks and less maintenance

TRACKS

Less compaction with track system
5,500 square inches of track on the ground which will leave a compaction of 6.3 pounds per square inch

TANK

2,675 imperial gallon tank

Total drainage tank

Domed ends for maximum strength and redirection of surging effect
